- ✗ No boosted posts (separate from management fee)

R6,300 pm

WHERE WILL THE CONTENT COME FROM?

All content created for your Facebook page will be based on real, relevant information from your business — ensuring that everything shared is accurate, professional, and aligned with your services. This means **we are not “guessing”** content, but rather building it from your existing assets and expertise.

IMPORTANT NOTE ON CONTENT SUPPLY

To ensure the highest quality and most effective results, certain materials will need to be supplied by your team on an ongoing basis. This includes:

- High-quality, up-to-date photos and videos
- Any new specials or events not currently available on your website

This collaboration ensures that all content remains authentic, relevant, and aligned with your actual service offering.

LET'S CREATE CONTENT THAT CAPTIVATES
AND TURN FOLLOWERS INTO LOYAL CLIENTS.
